La nostra filosofia

La nostra filosofia è semplice:

cercare di produrre degli amplificatori che suscitino emozioni su chi li ascolta, e che soprattutto, le stesse, si rinnovino ad ogni brano musicale.

Cerchiamo che la musica riprodotta trasmetta le emozioni dell'artista a chi lo sta ascoltando, senza eccessi, senza sotterfugi, senza nulla di più e ovviamente nulla di meno dell'idea dell'esecutore.

L'ascoltatore deve sentirsi immerso nella scena musicale, coinvolto, deve vivere i dettagli delle voci degli strumenti e tutto in modo naturale... con emozione.

Our philosophy

Our philosophy is simple:

We are producing amplifiers that arouse emotion, in which every note of music should precisely reflect the emotions of the composer and the performer. In addition to the technical excellence, our amplifiers satisfy the ultimate search for the 'life-like' performance. Therefore, not only a perfect soundstage, focus, and dynamics are involved, but also a 'spirit' - quite rare in many systems - blend in to the totally synergy of your system. The listeners feel immersed in the music, and be carried away through enjoying the life-like details of the instruments, in the most natural means possible...with emotion

The PF 100 Limited is the culmination of the collective knowledge and experience of all those who work with Master Sound.

The total absence of feedback makes the "PF 100" fast, with imaging that is truly amazing.

Our new, dual drive control system of the "PF 100's" pre-amp section grew from our careful research. Combined with our unique output transformer and powerful, 845 triodes working in Parallel Single Ended mode, the amplifier renders a genuinely engaging sound.

We use a semiautomatic biasing system, which once regulated, will give optimal life to the final tubes.

Finally, we use 24 karat gold connections on the PF 100's circuit gold board
