The Shape of Brilliance

New DALI FAZON F5

DALI FAZON F5 High Definition Loudspeaker

Home is not an escape or isolation behind closed doors. Home is where we can do exactly what we please. It's freedom to breathe, live, love, and play together with music as a dedicated companion to the life we live at home.

That's what the brand new DALI FAZON F5 is all about: Setting the standards and exceeding the limits for music enjoyment at home.

New technology and a courageous mindset made it possible to create a loudspeaker that truly unifies hi-fi performance and modern design in one brilliant package. While the renowned DALI sound principles always ensure to capture the rich nuances of any kind of great music - from ABBA to Zappa, from classic to rock, electronica, and jazz. Watch your favourite movies and TV-series or just the daily news, easy to hear and understand even at low sound levels.

Welcome to a new generation of high definition quality loudspeakers conveying authentic, natural sound from an elegantly, daringly designed body.

Find your freedom at home!

[Red finish not in stock]

This one is something special!

FAZON F5 is unique and nothing like the vast majority of loudspeakers on the market. It is the genuine mixture of craftsmanship, performance, and aesthetics to fulfil the dream of a new era's loudspeaker.

Proud Heir & Daring New Breakthrough

The technology is inherited from the MENTOR series with characteristics such as undistorted performance, open sound, and extraordinary resolution.

The oversized dome tweeter (28 mm/1.1"), integrating perfectly with 2 x 5" woofers/midranges, allows dynamics and even the finest musical details to flourish. The visual appearance is stunning and speaks for itself: modern, stylish, daring, and built on a unique aluminium body to ensure extremely rigid construction and minimized reflections. Because of the sophisticated curved shape, the FAZON F5 has no parallel sides, which prevents standing waves from arising.

Sound and shape

FAZON F5 is the image of future loudspeaker design and performance, matching the varying moods and needs of your day. From sleepy radio listening in the morning, reflecting music enjoyment in the afternoon, to movies in the evening or partying on a Saturday night. To spell it out: FAZON F5 unites form and function, gets shape into sound and sound in good shape.

[Virtually Wireless]

Option 1:
Cable inside the base, above the flooring

Option 2:
Cable outside the base, above the flooring

Option 3:
Cable inside the base, below the flooring

Virtually Wireless

Because of the exclusive and brand new terminals developed by DALI, you now have option to hide your loudspeaker cables in the floor.

This flexible terminal system makes room for several solutions – including a 100% camouflage of the cables in your home.

Sturdy Base

The diecast aluminium base provides a sturdy platform for the entire FAZON F5 speaker. And the integrated terminal housing accommodates a pair of spring loaded terminals, able to handle speaker cable in excess of 10mm².

Dual Layer Front Baffle

A sandwich baffle construction applying polymer sealant between the two parts is securely attached to the aluminium cabinet. This ensures an acoustically inert environment for the drivers, and vibrations from woofer to tweeter and cabinet are practically eliminated. The result is an undistorted performance.
